RE: Perc Regs

We are strongly against the proposed changes to the CATC measures.

#1. The information is inconclusive

#2. We've seen no concrete research data proving a direct link of perc and cancer (spoken by a third generation dry cleaner – 56 years)

#3. Perc is the best option to date

##4. Alternatives and regulation implementations are cost prohibitive for the majority of dry cleaners, which are largely mom and pop plants

#5. Two of the three options are unproven and unsafe
